

# DELIVERY SCHEDULE

Here's a guide on what kit components to expect, and when they'll be delivered once construction begins on your new home. Factors which may alter this schedule include:

- access to site
- remote sites
- weather conditions, and
- the speed at which your home is coming along

All deliveries and timeframes are *flexible*. Just stay in touch with us, discuss where you're at and we'll work with you to find the best timing and outcome for contractors, suppliers and you, the homeowner/builder.
